Covisint provides the cloud platform of choice for enabling the Internet of Things and identity-centric solutions

Covisint provides the leading cloud platform of choice for the Internet of Things and identity-centric solutions – offering secure and seamless connections between people, processes, systems and things for global enterprises.

Our open, developer-friendly, and enterprise-class Cloud Platform enables organizations to build solutions that quickly and securely identify, authenticate and connect users, devices, and information.

The numbers are staggering – billions of connected devices, billions of dollars in opportunity. The emergence of the IoT economy is shifting the way we think about products, customers, partners, supply chains and ecosystems. In today's hyper-connected world, developers, partners and customers are under growing pressure to collaborate and connect with more people and things than ever before.

This shifting paradigm is creating opportunities for disruption – rewarding the innovative thinkers and bold doers of the world. Increasingly, these action-oriented people and companies are turning to Covisint. Founded in the science of disruption, Covisint has been the cloud foundation for some of the world's most recognizable brands for more than a decade. The Covisint Platform allows users to recognize, authenticate and connect the right people, things and information at the right time – securely and at scale.

Covisint is the connected company – we securely connect ecosystems of people, systems and things to enable new service offerings, optimize operations, develop new business models and ultimately enable the connected economy. Today, we support more than 2,000 organizations and connect to more than 212,000 business partners and customers worldwide.
